

# User manual

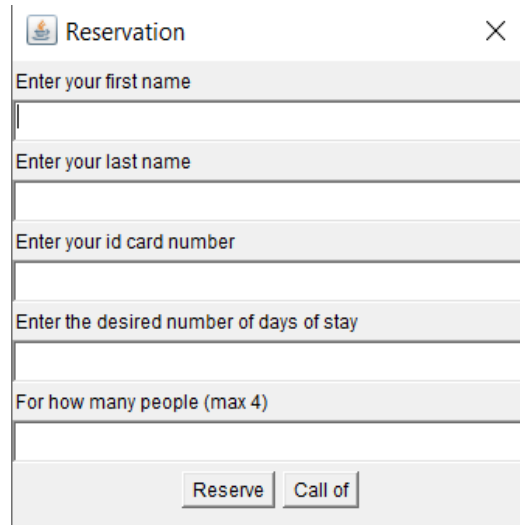

1. When you run the program, you will see a window like as in the image below.

Here you can see what types of rooms the hotel has as well as the price per night. Also you can see how many rooms are available.

If you want to book a room, you need to press the “Reserve” button and a new window will appear.

## 2) Reservation process

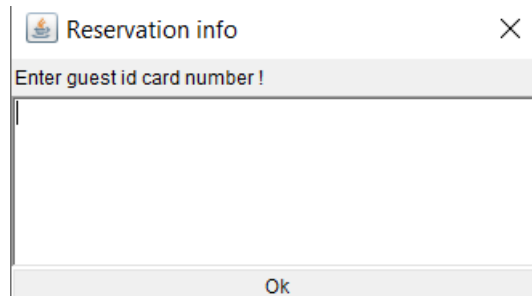

A screenshot of a software window titled "Reservation" with a close button (X) in the top right corner. The window contains five text input fields with the following labels: "Enter your first name", "Enter your last name", "Enter your id card number", "Enter the desired number of days of stay", and "For how many people (max 4)". At the bottom of the window, there are two buttons: "Reserve" and "Call of".

You need to fill in the given form, then to press one of the two buttons.

- 1) If you have pressed the "Reserve" button, a confirmation message about your reservation will appear and reservation will be entered into the database.
- 2) If you have pressed the "Reserve" button, all reservations for a given user will be deleted from the databases.

## 3) View process

If you want to see a reservation, you have to press view button, then the following form will appear.

A screenshot of a software window titled "Reservation info" with a close button (X) in the top right corner. The window contains a single text input field with the label "Enter guest id card number !". At the bottom of the window, there is an "Ok" button.

All you have to do is entering the required details and your booking information will appear.
